

## The Cub Saw

Meadoweld, the manufacturer of the Bear Saw, is proud to introduce the Cub Saw. The Cub Saw is designed specifically to reduce operator fatigue.

The **Meadoweld Cub Saw** is a reversing hydraulic hand saw for 16" saw abrasive blades; designed with a user-friendly trigger and handle.

- Wide Operator Handle with Optimal Length and a Curved Handle:
  - **Less bending over** during cutting.
  - **Minimizes wrist movement** to alleviate fatigue and potential injury.
  - **Effortless Oscillation of saw** during cutting.
- Extended Trigger:
  - **Less force to engage saw motor** significantly reducing hand fatigue.
- Clamp Arms provided with Ball Bearings:
  - **Increased life and stability** resulting in clean, straight cuts even when flipping the saw to finish a cut.
- Lightweight, Durable Construction
- High Torque Hydraulic Motor

### Cub Saw, P/N RS-16H Specifications:

Saw Weight: 35 Lbs. (16 kg)

Clamp Weight: 20 Lbs. (9 kg)

Dimensions: 40" L x 9" W x 17" H

Operating Parameters:

3400 RPM at 10 GPM (38 lpm) and 2000 psi (140 bar)
